## Here's what some of our customers have said about the many advantages of STREUfex:

As a lifetime horsewoman, I have tried many bedding products throughout the years and have always reverted back to wood shavings as my gold standard. That gold standard was challenged last year and replaced by a product called STREUfex. The quality of the bedding as well as its performance in the stall far exceeds even the best in shavings or wood pellets. As the owner of a veterinary assisted care lay-up facility, the bedding required for a compromised horse is vital to their recovery and for the normal horse, proper bedding is vital for good health maintenance. STREUfex fits the need whether considering the financial aspect, the ease in use, the mucking labor/time, the quality consistency, or the storability, AND perhaps most of all.....the horse's health and well-being.

Willow Brook chose STREUfex straw shavings for use in its Natural Horsemanship facility because the straw content in the bedding allowed for our ability to recycle them on our pastures, as opposed to wood shavings or pellets which do not necessarily enrich the soil and can cause acidity. There are also advantages of not having to water STREUfex pellets because there appears to be little if any dust, thus saving labor on maintenance, yet stalls remain dry enough to absorb moisture and still create a safe environment for horses' hooves.

I am very satisfied with this bedding for my horses. Having tried similar products, I find that STREUfex absorbs wetness just as well, and odor even better. There is also less dust associated with STREUfex than other products I've tried. And I really like that this bedding does not have to be wet down in order to expand. It expands quickly and easily as the horses walk around their stalls, and reduces moisture built-up in their hooves. I have one horse who loves to lie down while in his stall, and I am glad that STREUfex provides comfortable and dry bedding for him. Thanks for a great product!

"We have been using STREUfex for about five months now. We have experienced quite a few different stall beddings in the past couple of years and have found STREUfex to be the best product for us. Not only is it great for the environment, but it is 100% organic which makes it excellent for fertilizer to spread on all of our pastures. It is 100% dust free, easier cleaning of stalls and has dramatically reduced our waste. We noticed it breaks down much faster than shavings, reducing storage time and space. We highly recommend it.

Bob & Kathy Urban

*Although I was skeptical at first, STREUfex really works! I especially like the way it reduces the amount of waste I have to remove from my stalls every day. Since I started using STREUfex, the amount of waste I am adding to my manure pile has significantly decreased.*
